Semi-assembled  
frame for easy  
shipping

Structure provides strength as well as flexibility and comfort.

Heavy duty gas pistons ensure smooth operation of the wall bed.

6-ply poplar slats.

Frame halves are bolted together and secured with a flat bar.

Doors are decorative, not structural.

Hooks for easy and secure door installation.

- > Completely secure, easy to operate and assemble.
- > Sturdy tubular steel construction provides years of reliable use.
- > Designed for mattresses up to 10" (250 mm) thick.
- > Door stays closed without requiring a latch.

frame for easy  
shipping

## Operating the wall bed

For installation guide, see [www.impekk.com](http://www.impekk.com)

1

The wall bed is assembled and shown in lowered position.

2

Pivot the leg towards the inside of the unit. Make sure leg is fully closed.

3

Pull up gently to close. Leg serves as mattress retaining system. Pistons insure that door closes properly and remains closed.

Impekk offers a limited warranty on slat bases used in the wall bed as well as the mechanisms. The warranty covers the replacement of parts with manufacturing defects and/or breakage caused by regular use (labour not included). It does not cover damages caused by a poor installation or misuse of the product. Professional installation suggested. The bed must be secured to the wall into wood or metal studs.
